

- Stochastic Processes, SDEs and SPDEs:

H. Qiao and X. Zhang: Homeomorphism flows for non-Lipschitz stochastic differential equations with jumps. Forthcoming in *Stochastic Processes and their Applications*.

B. Goldys and B. Maslowski: The Ornstein Uhlenbeck bridge and applications to Markov semigroups. Forthcoming in *Stochastic Processes and their Applications*.

V.I. Bogachev and B. Goldys: Second derivatives of convex functions in the sense of A.D. Alexandroff on infinite dimensional spaces with measures. *Mathematical Notes* 79 (2006), 454-467

B. Goldys and F. Gozzi: Second order parabolic Hamilton-Jacobi equations in Hilbert spaces and stochastic control: L^2_μ approach. *Stochastic Processes and their Applications* 116 (2006), 1932-1963

B. Goldys and B. Maslowski: Lower estimates of transition densities and bounds on exponential ergodicity of stochastic PDEs. *Annals of Probability* 34 (2006), 1451-1496

B. Goldys and B. Maslowski: Exponential ergodicity for stochastic reaction-diffusion equations. In: *Stochastic Partial Differential Equations and Applications*, Chapman and Hall, 2006, 115-132.

V.I. Bogachev and B. Goldys: On second derivatives of convex functions on infinite-dimensional spaces with measures. *Doklady Mathematics* 72 (2005), 439-443.

B. Goldys and B. Maslowski: Exponential ergodicity for stochastic Burgers and 2D Navier-Stokes equations. *Journal of Functional Analysis* 226 (2005), 230-255.

- Financial Mathematics:

R. Ahlip and M. Rutkowski: Forward start options under stochastic volatility and stochastic interest rates. Forthcoming in *International Journal of Theoretical and Applied Finance*.

T.R. Bielecki, M. Jeanblanc and M. Rutkowski: Pricing and trading credit default swaps in a hazard process model. Forthcoming in *Annals of Applied Probability*.

T.R. Bielecki, S. Crépey, M. Jeanblanc and M. Rutkowski: Defaultable options in a Markovian intensity model of credit risk. Forthcoming in *Mathematical Finance*.

T.R. Bielecki, S. Crépey, M. Jeanblanc and M. Rutkowski: Arbitrage pricing of defaultable game options with applications to convertible bonds. Forthcoming in *Quantitative Finance*.

T.R. Bielecki, S. Crépey, M. Jeanblanc and M. Rutkowski: Valuation of basket credit derivatives in the credit migrations environment. In: *Financial Engineering. Handbooks in Operations Research and Management Science, Volume 15*, J.R. Birge and V. Linetsky, eds., Elsevier, 2008.

M. Rutkowski and K. Yousiph: PDE approach to the valuation and hedging of basket credit derivatives. *International Journal of Theoretical and Applied Finance* 10 (2007), 1261-1285.

T.R. Bielecki, M. Jeanblanc and M. Rutkowski: Hedging of basket credit derivatives in credit default swap market. *Journal of Credit Risk* 3 (2007), 91-132.

M. Rutkowski and N. Yu: An extension of the Brody-Hughston-Macrina approach to modeling of defaultable bonds. *International Journal of Theoretical*

and Applied Finance 10 (2007), 557-589.

T.R. Bielecki, M. Jeanblanc and M. Rutkowski: Replication of contingent claims in a reduced-form credit risk model with discontinuous asset prices. *Stochastic Models* 22 (2006), 661-687.

T.R. Bielecki, M. Jeanblanc and M. Rutkowski: Hedging of credit derivatives in models with totally unexpected default. In: *Stochastic Processes and Applications to Mathematical Finance*, J. Akahori et al., eds., World Scientific, Singapore, 2006, 35-100.

T.R. Bielecki, M. Jeanblanc and M. Rutkowski: Completeness of a general semimartingale market under constrained trading. In: *Stochastic Finance*, M. do Rosário Grossinho et al., eds., Springer-Verlag, 2006, 83-106.

T.R. Bielecki, M. Jeanblanc and M. Rutkowski: PDE approach to valuation and hedging of credit derivatives. *Quantitative Finance* 5 (2005), 1-14.

T.R. Bielecki, M. Jeanblanc and M. Rutkowski: Hedging of defaultable claims. In: *Paris-Princeton Lectures on Mathematical Finance 2003*. R. Carmona et al., eds. Springer-Verlag, 2004, 1-132.

T.R. Bielecki, M. Jeanblanc and M. Rutkowski: Modelling and valuation of credit risk. In: *Stochastic Methods in Finance*, M. Frittelli and W. Runggaldier, eds., Springer-Verlag, 2004, 27-126.
